

Scalamobil - hints for battery usage

How to treat the battery correctly

- Charge battery before delivery
- Battery has not yet reached its full capacity when new
- Fully discharge the battery the first 3 to 5 times
- Afterwards the battery shall be charged after every use
- Do not fully discharge the battery too often
- If not in use, please charge the battery from time to time
- Best condition for a battery is 20°C. Lower temperatures will reduce the capacity and range
- A well treated battery can be used over 1.000 times
